### PART 1046—SUPPLIERS

[Limitation Order L-63, as Amended Nov. 12, 1943]

§ 1046.1 *Suppliers' Inventory Limitation Order L-63—(a) Definitions.* (1) "Supplies" means all the supplies listed below:

- (i) Automotive supplies.
- (ii) Aviation supplies.
- (iii) Builders' supplies.
- (iv) Construction supplies.
- (v) Dairy supplies.

- (vi) Electrical supplies.
- (vii) Farm supplies.
- (viii) Foundry supplies.
- (ix) Grain elevator supplies.
- (x) Hardware supplies.
- (xi) Industrial supplies.
- (xii) Plumbing & heating supplies.
- (xiii) Refrigeration supplies.
- (xiv) Restaurant supplies.
- (xv) Textile mill supplies.
- (xvi) Transmission supplies.
- (xvii) Welding & cutting supplies.

even though such items or materials may be "consumers' goods" within the meaning of that term as used in Limitation Order L-219; but supplies shall not be deemed to include any of the items or materials set forth in List A.

(2) "Supplier" means any person (other than a producer) located in the 48 states or the District of Columbia, whose business consists, in whole or in part, of the sale from stock or inventory of supplies. "Supplier" includes wholesalers, distributors, jobbers, dealers, retailers, branch warehouses of producers and other persons performing a similar function.

(3) "Producer" means any person including any branch, division or section of any enterprise, which manufactures, processes, fabricates, assembles or otherwise physically changes any material.

(4) "Sales" means sales from stock, including consigned stocks and excluding direct shipments (i. e., excluding sales made by a supplier of supplies which such supplier has never received delivery of but has ordered from the producer thereof with instructions that they be shipped directly to the supplier's customer).

(5) "Seasonal lines" means any line of supplies in which a minimum of 40% of the supplier's total annual sales are made during a period of 90 days, or less.

(6) "Maximum permissible inventory" means

(i) In the case of a supplier located in Arizona, California, Colorado, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, Wyoming, North Dakota, South Dakota, Nebraska, Kansas, Oklahoma and Texas, an inventory (owned or consigned to him) of supplies of a total dollar value at cost (by physical or book inventory, at the option of the supplier) equal to the sales of such supplies at net sales figures, shipped from his inventory, during the four preceding calendar months.

(ii) In the case of a supplier located in the District of Columbia or any of the forty-eight states not enumerated in paragraph (a) (6) (i) above, an inventory (owned or consigned to him) of supplies of a total dollar value at cost (by physical or book inventory, at the option of the supplier) equal to sales of such supplies at net sales figures shipped from his inventory during the three preceding calendar months.

(b) *Limitation of supplier's inventories.* (1) Except as provided in paragraph (b) (3), (4), (5), and (6), no supplier shall accept any delivery of supplies from any person which will effect an increase in the inventories of the supplier above his maximum permissible inventory; and

(2) Except as provided in paragraphs (b) (3), (4), (5) and (6), no person shall make to any supplier any delivery of supplies which such person knows or has reason to believe will effect an increase in such supplier's inventory of supplies above the supplier's maximum permissible inventory.

(3) Any supplier, regardless of where located, shall be permitted to purchase and store an amount of seasonal lines equal to those which he purchased in the peak period of a comparable period of the previous year, but this peak period shall not exceed 120 days.

(4) A supplier may accept delivery of supplies which will increase his stock above the maximum permissible inventory, if such supplier's inventory of supplies is at the time of delivery less than his maximum permissible inventory and the delivery is of the minimum quantity of such supplies that can be commercially procured.

(5) A supplier may accept delivery of specific items of supplies when his stock of all items in the aggregate exceeds, or will by virtue of such acceptance exceed, his maximum permissible inventory, but only to the extent necessary to bring such supplier's inventory of those specific items (owned or consigned to him) up to a total dollar value equal to the sales of such items shipped from such supplier's inventories during the preceding month.

(6) The War Production Board may, from time to time, exempt specified suppliers or classes of suppliers from the provisions of this order, subject to such restrictions as the War Production Board may impose.

(7) The provisions of this order shall not apply to any supplier whose total inventory at cost, including consigned stocks, of all supplies is less than \$35,000.

(c) *Provisions of other orders.* No provision of this order shall be construed to permit the accumulation of inventories of any item of material in contravention of the provisions of any other applicable order or orders issued by the War Production Board or heretofore issued by the Office of Production Management.

(d) *Appeals.* Any appeal from the provisions of this order shall be made by filing a letter in triplicate, referring to the particular provision appealed from and stating fully the grounds of the appeal.

(e) *Records and reports.* Each supplier (other than those who are exempt under paragraph (b) (6) or (b) (7)) must keep an up-to-date record of his total net monthly sales of supplies from stock; and his total inventory of supplies at the end of each month. He need not keep a separate record of his sales and inventory of each type of supplies. A record of his sales and inventory of all kinds of supplies in the aggregate will be satisfactory. In preparing his sales record he should use net selling prices, including sales from consigned stock and excluding direct shipments. His inventory record may be based either

on book inventory or physical count. Inventory valuations must be at cost and must include consigned stock. The sales and inventory data required by this paragraph must be preserved for a period of at least two years, available for inspection by authorized representatives of the War Production Board. This record keeping plan has the approval of the Bureau of the Budget pursuant to the Federal Reports Act of 1942. Subject to the approval of the Bureau of the Budget, the War Production Board may at any time ask for the submission of this data.

(f) *Applicability of priorities regulations.* This order and all transactions affected thereby are subject to all applicable provisions of the priorities regulations of the War Production Board, as amended from time to time.

(g) *Communications.* All communications concerning this order shall be addressed to War Production Board, Wholesale and Retail Trade Division, Industrial and Hardware Supplies Branch, Washington, D. C., Ref.: L-63.

Issued this 12th day of November 1943.

WAR PRODUCTION BOARD,  
By J. JOSEPH WHELAN,  
Recording Secretary.

#### PART 1226—GENERAL INDUSTRIAL EQUIPMENT<sup>1</sup>

[General Conservation Order L-300 as Amended, Nov. 12, 1943]

##### SMALL AIR CIRCUIT BREAKERS

The fulfillment of requirements for defense of the United States has created a shortage in the supply of materials and in the facilities used in the production of small air circuit breakers, for defense, for private account, and for export; and the following order is deemed necessary and appropriate in the public interest and to promote the national defense.

§ 1226.92<sup>1</sup> *General Conservation Order L-300—(a) Definitions.* For the purpose of this order:

(1) "Person" means any individual, partnership, association, business trust, corporation, governmental corporation or agency, or any organized group of persons, whether incorporated or not.

(2) "Circuit breaker" means any new two or three-pole small air circuit breaker having a quick-make, quick-break operating mechanism, with a single handle for operating all poles, completely enclosed in a molded composition or plastic housing, and having a rating not in excess of 600 amperes or 600 volts, and a rated interrupting capacity of not less than 5,000 nor more than 25,000 R. M. S. amperes. The term "quick-make, quick-break" operating mechanism means a mechanism, which is a built-in part of the circuit breaker, so designed that the rate of contact motion while actually making or breaking the circuit cannot be changed by manipulation of the handle.

(3) "Manufacturer" means any person to the extent that he is engaged in the business of manufacturing circuit breakers as defined herein.

(4) "Trip element" means an assembly of two or three bimetallic or magnetic devices which function at a predetermined value of current or time to trip a latch mechanism permitting a spring to open simultaneously all of the poles of the circuit breaker.

(5) "Frame size" means the maximum ampere rating for the particular size of circuit breaker mechanism.

(b) *Restrictions on acceptance and delivery of orders.* On and after June 24, 1943, no person shall accept any order for any circuit breaker or deliver any circuit breaker in fulfillment of any order unless the order bears a preference rating of AA-5 or higher.

<sup>1</sup> Formerly Part 3264, § 3264.1.

(c) *Restrictions on manufacture.* (1) On and after June 24, 1943, no manufacturer shall accept any order or commence manufacture in fulfillment of any order for a circuit breaker unless such circuit breaker is to be manufactured in accordance with the standards prescribed in subparagraph (2) below. On and after August 8, 1943, no manufacturer shall deliver any circuit breaker unless it has been manufactured in accordance with such standards. The limitations and restrictions of this subparagraph (1) shall not apply to any order for or delivery of any circuit breaker which was completely fabricated and assembled on June 24, 1943.

(2) Except as otherwise provided in subparagraph (1) above, circuit breakers shall be manufactured in compliance with the following standards:

(i) They shall be fabricated and assembled only in the frame size and with the trip element rating specified in Schedule A hereto.

(ii) Circuit breakers so designated in Schedule A shall include only trip elements for instantaneous operation.

(iii) All poles of a circuit breaker trip element shall be calibrated for the same current and time value.

(iv) All trip elements of a circuit breaker shall be calibrated for operation in an ambient temperature of 25° C.

(v) No circuit breaker shall be fabricated or assembled with the following attachments:

a, b, c, d,  
[Deleted Nov. 12, 1943]

(e) Reverse power.

(f) Reverse current.

(g) Motor driven or solenoid type operating mechanism for remote control.

(d) *Restrictions on testing.* No manufacturer shall supply test data or perform tests other than those prescribed for circuit breakers in Federal Specification W-P-131A issued September 26, 1941 and published by the United States Government Printing Office, or Navy Specification 17B1 of latest effective issue.

(e) *Exemptions.* The limitations and restrictions of paragraph (c) shall not apply to (1) any circuit breaker delivered for use on board any vessel, or on any field generator, owned or operated by the Army, Navy, Maritime Commission, or War Shipping Administration, or (2) any circuit breakers delivered for use on tanks, aircraft, ordnance equipment, or radar equipment.

(f) *Miscellaneous provisions.*—(1) *Other limitation orders.* Nothing in this order shall be construed to permit any person to sell, deliver, or otherwise transfer, or any manufacturer to purchase, receive delivery of or otherwise acquire any raw materials, semi-processed parts, or finished products in contravention of the terms of any L or M order, or amendments or supplements thereto, or other regulation of the War Production Board effective at the date of any such sale, delivery, or other transfer. Where the limitations imposed by any other L or M order are applicable to the subject matter of this order, the most restrictive limitation shall apply, unless otherwise specifically provided herein.

(2) *Violations.* Any person who willfully violates any provision of this order, or who willfully furnishes false information to the War Production Board in connection with this order is guilty of a crime and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using material under priority control and may be deprived of priorities assistance by the War Production Board.

(3) *Appeals.* Any appeal from the provisions of this order shall be made by filing a letter in triplicate, referring to the particular provision appealed from and stating fully the grounds of the appeal.

(4) *Communications.* All reports required to be filed hereunder, and all communications concerning this order, shall, unless otherwise directed, be addressed to: War Production Board, General Industrial Equipment Division, Washington, D. C. Ref.: L-300.

Issued this 12th day of November 1943.

#### PART 1226—GENERAL INDUSTRIAL EQUIPMENT

[Interpretation 1 to General Conservation Order L-318]

##### SPOT WELDING ELECTRODES

The following interpretation is issued with respect to General Conservation Order L-318.

General Conservation Order L-318 contains restrictions on the production of spot welding electrodes. Some confusion has arisen as to whether these restrictions apply to persons who make spot welding electrodes for their own use. The restrictions of the order apply to producers and the term "producer" is defined in paragraph (a) (1) as "any person engaged in the manufacture of spot welding electrodes". It follows that the order applies to persons who make spot welding electrodes for their own use as well as to persons who make them for sale to others.

Issued this 12th day of November 1943.

<sup>1</sup> Formerly, Chlorinated Hydrocarbon Refrigerants.

or sections of an enterprise, if not actually engaged in the manufacture of systems or refrigerant containing parts of systems.

(6) "Insecticide manufacturer" means any person who uses F-12 gas in the production of insecticide.

(7) "User" means any person who installs F-12 gas in a refrigerating or air-conditioning system, other than an equipment manufacturer. It includes suppliers, service agencies, owners or lessees, to the extent that they engage in installing F-12 gas in any system.

(b) *Systems for which no deliveries are permitted.* (1) No person (including users, dealers, and other suppliers, and producers) shall deliver, or accept delivery of, any F-12 gas for use in, or for resale for use in any new or used system which is of a type referred to in List A.

(2) During the period from November 12, 1943, through March 31, 1944, no person (including users, dealers, and other suppliers, and producers), shall deliver, or accept delivery of, any F-12 gas for use in, or for resale for use in any new or used system of any type (not in List A) unless the system must be operated under one or more of the following conditions:

(i) Where an air-cooled condenser is used and the ambient temperature is 110° F or higher; or

(ii) Where the saturated refrigerant temperature corresponding to the suction pressure is less than minus 10° F; or

(iii) Where aluminum or magnesium alloys or rubber have been used in construction of the system and come in contact with the refrigerant, and are not easily replaceable; or

(iv) Where the system is for use aboard ship or outside of the continental United States by the Army, Navy, Maritime Commission or War Shipping Administration; or

(v) Where the total operating charge required to operate the system is ten (10) pounds or less of F-12 gas and the system was in operation on November 12, 1943, and is used for food preservation; or

(vi) Where the use of Group 2 or Group 3 refrigerants, as defined in the American Standard Safety Code for Mechanical Refrigeration, ASRE Circular No. 15, ASA-B 9-1939, as approved by the American Standards Association April 20, 1939, is prohibited by that Code.

(The above restrictions apply not only to systems used for ordinary civilian purposes, but also to those owned, operated, or used within the continental United States by the Army, Navy, Maritime Commission or War Shipping Administration, including post exchanges and ships service stores, other than those used aboard ships.)

(3) Attention is called to paragraph (c) (2), which prohibits a supplier from delivering F-12 gas except on certified orders.

(c) *Deliveries by suppliers.* (1) No supplier shall deliver any F-12 gas to the following non-retail users, namely: The Army, Navy, Maritime Commission, War Shipping Administration, post ex-

changes, ships service departments and activities, equipment and insecticide manufacturers, for new or used systems, or for use in insecticide, without specific authorization from the War Production Board. Any supplier may deliver F-12 gas to any other person, for use in any new or used systems not referred to on List A of this order, if it must be operated under one or more of the conditions stated in (b) (2) (i) to (b) (2) (vi), both inclusive.

No person shall accept from a supplier any delivery of F-12 gas which is prohibited by the restrictions in this order.

(2) Whenever the owner of a system or any other user wishes to obtain F-12 gas for installation in a system or systems for which deliveries by suppliers are permitted under this order, he may place his order with any supplier for the minimum quantity, which the available cylinder or cylinders permit, necessary to bring the charge in the system or systems up to a normal operating charge. He must certify his order, or the vendor's delivery receipt, by a certificate endorsed on or attached to it, showing that the F-12 gas is to be used for such purposes only, and that he is not holding any empty cylinders not owned by him, which shall be in substantially the following form:

The undersigned purchaser certifies to the seller and the War Production Board that he does not have any F-12 gas cylinders not owned by him, which have been empty for more than 15 days; and that the F-12 gas covered by this order will not be used or resold for any purposes not permitted by Order M-28.

Such certificate, which must be signed by the purchaser or his authorized official, will constitute a representation that what is stated in it is true. A supplier must not deliver any F-12 gas except under certified orders; and he must not make delivery under any order which is certified if he knows, or has any reason to believe that the certificate furnished with such order is untrue, incomplete, or inaccurate. In such a case the supplier must reject the order, and should explain why he is doing so, so that the prospective purchaser can comply with this order. Each supplier must keep all accepted orders and certificates which he receives, for a period of two years, for inspection by the War Production Board. (Certificates in the form required by this order before its amendment on November 12, 1943, may continue to be used for 30 days after that date, in place of the above form.)

This restriction shall not prevent a person who services several systems for which deliveries are permitted by this order from purchasing a cylinder of F-12 gas from a supplier, if the amount purchased is the smallest quantity practicable considering the sizes of the standard commercial cylinders and the amount needed in his current operations.

(3) No "standby charge" or any other quantity of F-12 gas, over and above that needed to bring the total charge in a system or systems up to the normal operating charge, shall be delivered to or accepted by any person for use in a sys-

tem which he owns, leases, or operates (except the Army, Navy, Maritime Commission or War Shipping Administration): except, however, that a "standby charge" may be maintained for a system which is operated primarily for one of the following purposes: air conditioning or refrigeration for the production and storage of penicillin, or blood serum; or refrigeration for the storage of blood for plasma, or the production or storage of blood plasma.

(d) *Deliveries by producers.* Each producer shall hold his entire inventory of F-12 gas, together with all additional quantities produced or otherwise obtained by him from time to time, for delivery under such orders and for such uses as may be authorized or directed from time to time by the War Production Board. No deliveries of F-12 gas shall be made by a producer except pursuant to specific authorizations or directions heretofore or hereafter issued by the War Production Board.

(e) The provisions of this order shall be followed by every producer, contract agent, supplier, user, equipment manufacturer, insecticide manufacturer, and any other person buying, selling or delivering F-12 gas, without any regard to any preference ratings which have been assigned or which may hereafter be assigned to particular contracts or orders.

(f) *Miscellaneous provisions.* (1) *Applicability of regulations.* This order and all transactions affected thereby are subject to all applicable regulations of the War Production Board, as issued and amended from time to time.

(2) *Reports.* (i) Each equipment manufacturer who wishes to secure delivery of F-12 gas during any month for charging systems or parts produced by him, or for factory repair and charging of sealed or hermetic condensing units, shall file with the War Production Board, on or before the 15th day of the preceding month a report on Form WFPB-3326, prepared in accordance with the instructions for such form.

(ii) Any person wishing to secure F-12 gas during any month, for use in insecticide, or for the manufacture or testing of any equipment other than refrigeration or air conditioning systems or parts, shall file with the War Production Board, on or before the 20th day of the preceding month, a report by letter, in triplicate, showing the minimum amount required for the month, the purpose for which required, and the amount used during the preceding calendar month for that purpose.

(3) *Violations.* Any person who willfully violates any provisions of this order, or who, in connection with this order, willfully conceals a material fact or furnishes false information to any department or agency of the United States is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing

<sup>2</sup> The reporting requirements of this order have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

or using materials under priority control, and may be deprived of priorities assistance.

(4) *Appeals.* Any appeal from the provisions of this order, or any direction thereunder, shall be made by filing a letter in triplicate, referring to the particular provision appealed from and stating fully the grounds of the appeal.

(5) *Communications.* All reports to be filed and other communications concerning this order should be addressed to: War Production Board, General Industrial Equipment Division, Washington 25, D. C., Ref. M-28.

**PART 3133—PRINTING AND PUBLISHING**

[Conservation Order M-339 as Amended Nov. 12, 1943]

**COPPER AND ZINC FOR PRINTING PLATES**

The fulfillment of the requirements for the defense of the United States has created a shortage in the supply of copper, zinc and paper for the production of printed matter for defense; for private account and for export, and the following order is deemed necessary and appropriate in the public interest and to promote the national defense:

§ 3133.30 *Conservation Order M-339—*  
(a) *Definitions.* Meaning of terms used in this order:

(1) A person "uses" copper, copper base alloy, copper scrap, copper base alloy scrap, or zinc when he first changes its form or shape in the production of printing plates by putting it into an electrolytic bath or etching or engraving it or re-using it in any way. However, in the case of an offset plate, zinc is "used" when the first prints are made from the plate. Re-use of a zinc offset plate after re-graining shall not be considered "use".

(2) The term "copper" as used hereafter includes copper, copper base alloy, copper scrap and copper base alloy scrap.

(3) The term "printing plate" means any kind or shape of printing or marking plate containing copper or zinc except plates made in plants or offices whose sole processing of plates is for use in connection with office machinery as listed in General Limitation Order L-54-c as amended from time to time.

(b) *Limitation on the use of zinc.*

(1) In any calendar quarter beginning with the fourth quarter of 1943, no person shall use more zinc in the production of printing plates than 60%, by weight, of the zinc which he used in the production of such plates during the same quarter of 1941. However, a person may use an additional 15% during one calendar quarter if he uses that much less during the next quarter. Also, if he uses less than this order allows for one quarter, he may increase his use in the next quarter by that amount.

(2) No person shall deliver zinc to any plate-maker and no plate-maker shall accept zinc, except to fill an order carrying an authorized preference rating of AA-5 or higher.

(c) *General Limitations on the use of copper.* In any calendar quarter after

the second quarter of 1943, no person shall use more copper in the production of printing plates than 60%, by weight, of the copper which he used in the production of such plates during the same quarter of 1940. However, a person may use an additional 15% during one calendar quarter if he uses that much less during the next quarter. Also, if he uses less than this order allows for one quarter, he may increase his use in the next quarter by that amount.

(d) *Further provisions regarding the use of copper in certain processes—*(1) *Photoengraving.* In order to liquidate inventories of 16-gauge photoengravers' sheet copper and zinc which are now in the possession of photoengravers and suppliers, 25 percent of the weight of any copper or zinc finished as 16-gauge photoengravers' sheet before July 1, 1943 which a photoengraver uses after that date, shall not be counted in computing his allowable usage under paragraph (b) or (c) of this order. For example, a photoengraver may use four pounds of such 16 gauge copper or zinc but he need charge only three pounds of the four against his allowable usage. Photoengravers' sheet copper or zinc thicker than 16-gauge is not exempted under this provision.

(2) *Electrotyping and gravure plate-making.* (i) For the fourth calendar quarter of 1943 and for each calendar quarter after that, one pound or more out of every two pounds of copper used for electrotyping and gravure plate-making must be in the form of old printing plates or other copper scrap derived from plate-making operations.

(ii) If, in any calendar quarter, 95% or more of the copper which a person uses for electrotyping and gravure plate-making is in the form of old plates or other scrap derived from plate-making operations, he will be allowed a "bonus" equal to 10% of the copper which he used in that quarter for electrotyping and gravure plate-making. This "bonus" must be used in the form of old plates or other scrap derived from plate-making operations. It may not be used after the end of the quarter following the one in which it was "earned."

(iii) The delivery, acceptance and use of copper scrap for electrotyping and gravure plate-making, even when the scrap results from the plate-making operations of a person's own plant, is subject to approval under Supplementary Order M-9-b as amended from time to time.

(3) *Copperplate engraving.* (i) A person's entire allowable usage of copper for copperplate engravings must be composed of sheets which were in his possession on December 31, 1942 or old engraved plates, or a combination of the two.

(ii) Each copperplate engraver must deliver to a scrap dealer, or other person authorized by the War Production Board to accept the scrap, at least three pounds

of old copperplate engravings for each pound of copper sheet or old engraved plates used by him in making new copperplate engravings. Such delivery must be made not later than fifteen days after the end of the calendar quarter in which the copper was used for this purpose. This paragraph exempts copperplate engravings from the provisions of Order M-9-b relating to the acceptance, delivery and use of old copperplate engravings in the production of new engraved plates.

(e) *Exceptions regarding copper and zinc.* (1) When plates are ordered by any department or agency of the United States Government or when plates are made exclusively for printed matter which is ordered directly from the producer of such printed matter by any department or agency of the United States Government, the copper or zinc used in such plates need not be counted in calculating the plate-maker's allowable usage under paragraph (b) or (c) of this order if the purchase order is endorsed as provided in the following paragraph. The exemption contained in this paragraph shall not apply in the case of subcontracted printing, that is, when the order for printed matter is placed by any person other than a department or agency of the United States Government even when the printed matter is delivered to such department or agency in the fulfillment of a government contract. Zinc used in an offset plate shall not be deemed to be exclusively for Government printed matter unless the plate, itself, is actually delivered to a department or agency of the United States Government. Official Army and Navy camp, post, station or unit newspapers are included in the type of printing covered by this paragraph if (a) they are ordered by the officer in command of the Army or Navy establishment on official War Department or Navy Department purchase orders, requisition orders or contracts, (b) they contain no paid advertising, and (c) they are not owned, edited or operated by civilians but are run entirely by military personnel (although the platemaking and printing may be done in commercial plants).

(2) Each person who orders plates for the purposes described in the first sentence of paragraph (e) (1) shall endorse on the purchase order for such plates a statement in substantially the following form signed manually, or as provided in Priorities Regulation No. 7 (§ 944.27), by an official duly authorized for such purpose:

The undersigned hereby certifies that the plates covered by this order are to be used in the production of printed matter as described in the first sentence of paragraph (e) (1) of Order M-339, such plates or printed matter being ordered by a department or agency of the United States Government under Contract No. \_\_\_\_\_

\_\_\_\_\_  
Name of person.

\_\_\_\_\_  
Duly authorized official.

(3) The gross weight of copper and of zinc used to fill orders endorsed in the manner set forth in the previous paragraph shall be reported to the Printing and Publishing Division of the War Production Board once every calendar quarter. Persons who apply for copper on Form CMP 4B or for zinc on Form PD-1A shall make this report in a letter attached to such application. Persons who do not apply on these forms shall report by letter not later than fifteen days after the end of each calendar quarter. The report shall state the weight of the metal and whether it is copper, zinc or electrotyping metal. In the case of electrotyping metal, the gross weight of the plates, including backing metal, shall be stated. The original records must be kept on file as long as this order remains in force and for two years after that. This reporting provision has been approved by the Bureau of the Budget pursuant to the Federal Reports Act of 1942.

(f) *Effect of allocations, preference ratings, and inventories.* Notwithstanding any allocation number or symbol or any preference rating which may be extended to any person or which may be granted to any person on specific application or by any blanket symbol or rating procedure, the provisions of this order shall prevail with relation to the amount of copper and zinc which may be used by any person in the production of printing plates. The fact that a person has an inventory of copper or zinc, or an allocation or rating for copper or zinc, in excess of his allowable usage, or that he has received permission under Order M-9-b for the use of copper scrap does not justify his use of such copper or zinc in excess of his allowable usage as prescribed by this order.

NOTE: Paragraph (g) added; former paragraphs (g) (2), (3) and (h) redesignated (h), (i), (j) and (k) respectively.

(g) *Inventory limitation.* No person shall accept delivery of copper or zinc if his combined new metal inventory of all gauges and sizes of that metal for a given type of plate-making process prior to such acceptance exceeds a 60 days' supply at his current allowable rate of consumption.

(h) *Applicability of regulations.* This order and all transactions affected by it are subject to the regulations of the War Production Board, as amended from time to time.

(i) *Appeals.* Any appeal from the provisions of this order shall be made by filing a letter referring to the particular provisions appealed from and stating fully the grounds of the appeal.

(j) *Communications to the War Production Board.* All communications concerning this order shall, unless otherwise directed, be addressed to: War Production Board, Printing & Publishing Division, Washington 25, D. C. Ref.: M-339.

(k) *Violations.* Any person who willfully violates any provision of this order, or who, in connection with this order, willfully conceals a material fact or furnishes false information to any department or agency of the United States is

guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, material under priority control and may be deprived of priorities assistance.

#### PART 3293—CHEMICALS<sup>1</sup>

[Allocation Order M-269 as Amended  
Nov. 12, 1943]

##### ASCORBIC ACID

§ 3293.361<sup>1</sup> *Allocation Order M-269—*  
(a) *Definitions.* (1) "Ascorbic acid" means ascorbic acid (also known as cevitamic acid or vitamin C), in crude or refined form. The term includes all chemical compounds of ascorbic acid but does not include standard dosage forms (tablets, capsules, ampoules, solutions, etc.), combinations in feeds, foods or beverages, or ascorbic acid of natural origin.

(2) "Producer" means any person engaged in the production of ascorbic acid, and includes any person who imports ascorbic acid or has ascorbic acid produced for him pursuant to toll agreement. The term does not include any person who does not produce ascorbic acid but who incorporates ascorbic acid into standard dosage forms, feeds, foods or beverages.

(3) "Distributor" means any person who purchases ascorbic acid solely for the purpose of resale without further processing and without changing the form thereof. The term does not include any person who delivers ascorbic acid to any other person for incorporation into standard dosage forms, feeds, foods or beverages, where the person making delivery retains title to the ascorbic acid and to the product made therefrom. Also, the term does not include any person whose total purchases of ascorbic acid are solely for exports.

(b) *Restrictions on deliveries and use.* (1) No producer or distributor shall deliver or use any ascorbic acid except as specifically authorized or directed in writing by War Production Board. No person shall accept delivery of any ascorbic acid which he knows or has reason to believe is delivered in violation of this order.

(2) Authorizations or directions with respect to deliveries or use of ascorbic acid by producers or distributors in each calendar month will so far as practicable be issued by War Production Board prior to the commencement of such month (in the normal case on Form WPB-2947 (formerly PD-602) filed pursuant to paragraph (c) (1)), but War Production Board may at any

<sup>1</sup> Formerly Part 3151, § 3151.1.

time issue directions to any person with respect to deliveries to be made or with respect to the use or uses which may or may not be made of ascorbic acid to be delivered to, or already in the inventory of, the prospective user.

(3) In the event that any producer or distributor, after receiving notice from War Production Board with respect to a delivery of ascorbic acid which he is authorized or directed to make to any customer or group of customers, shall be unable to make such delivery either because of receipt of notice of cancellation or otherwise, such producer or distributor shall forthwith give notice of such fact to the War Production Board, Chemicals Division, Washington 25, D. C., Ref.: M-269, and shall not, in the absence of specific written authorization or direction from War Production Board sell or otherwise dispose of the ascorbic acid which he is unable to deliver as aforesaid.

(4) However, application and specific authorization shall not be required for deliveries by any producer or distributor during any calendar month in which he delivers not more than 3 kilograms of ascorbic acid to any one customer and in which his total deliveries do not exceed 10 kilograms of ascorbic acid.

(c) *Applications.*—(1) Each producer and distributor seeking authorization to deliver or use ascorbic acid during any calendar month beginning with June 1943, shall file application on or before the 20th day of the preceding month. Application will be made on Form WPB-2947 (formerly PD-602) in the manner prescribed therein, subject to the following special instructions:

(i) Copies of Form WPB-2947 (formerly PD-602) may be obtained at local field offices of the War Production Board.

(ii) An original and three copies shall be prepared of which the original and two copies shall be forwarded to War Production Board, Chemicals Division, Washington 25, D. C., Ref.: M-269, the third copy being retained for applicant's files. The original filed with War Production Board shall be manually signed by applicant by a duly authorized official.

(iii) In the heading under "Name of Material", specify "Ascorbic acid"; under "Grade", specify quality, for example, USP, crude, calcium ascorbate; under "WPB Order No.", specify "M-269"; under heading "This schedule is for delivery to be made in ----- month/quarter, 194--", strike out word "quarter", and specify month during which deliveries covered by the application are to be made; under "Unit of Measure", specify "Kilograms"; under "Name of Company", applicant will specify his name and the address of his plant or warehouse.

(iv) In Column 1 (except as provided in subdivision (v)), applicant will list the name and delivery destination of each customer to whom he proposes to deliver ascorbic acid in the applicable month.

(v) Applicant need not list the names or delivery destinations of any customer to whom, in the applicable month, he

proposes to deliver 3 kilograms or less of ascorbic acid. Applicant will instead lump the total deliveries of 3 kilograms or less which he proposes to deliver for export in such month and in addition will lump all other deliveries of 3 kilograms or less to be made in such month. More specifically, he will list in Column 1 "Total small order deliveries for export" and in Column 4 will state the total quantity represented by such deliveries, and he will also specify in Column 1 "Total other small order deliveries" and in Column 4 will state the quantity represented by such other deliveries.

(vi) In Column 1a, applicant will specify in each case, except with respect to deliveries of 3 kilograms or less to any person in any calendar month, the use to be made of the ascorbic acid to be delivered by him (as for example, civilian medicinal, Army medicinal, food fortification). He will also, where sale is to a distributor for resale, specify "Resale".

(vii) Applicant will also show in Column 7 Army, Navy, or other government agency specification and contract numbers, as well as export license numbers, if any.

(viii) A producer requiring permission to use all or part of his own production of ascorbic acid (whether or not for use in the manufacture of tablets or other dosage forms) shall list his own name on Form WPB-2947 (formerly PD-602) as a customer, specifying in Column 1a, where that is the case, that his use is the manufacture of tablets or other dosage forms. The receipt by a producer of such Form PD-602, signed by War Production Board, shall constitute authority to such producer to use ascorbic acid in the quantities and for the purposes stated in such approved form.

(ix) Each producer will fill out Table II in its entirety, and each distributor will fill out Columns 8, 10, 12 and 13 of such table. In Column 8, under "grade", producers and distributors will specify quality; for example, USP, crude, calcium ascorbate.

(2) War Production Board may issue special directions to any person with respect to preparing and filing Form WPB-2947 (formerly PD-602).

(d) *Miscellaneous provisions.*—(1) *Applicability of regulations.* This order and all transactions affected thereby are subject to all applicable regulations of the War Production Board, as amended from time to time.

(2) *Violations.* Any person who willfully violates any provision of this order, or who, in connection with this order willfully conceals a material fact or furnishes false information to any department or agency of the United States is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using material under priority control and may be deprived of priorities assistance.

(3) *Communications to War Production Board.* All reports required to be filed hereunder, and all communications concerning this order, shall, unless other-

wise directed, be addressed to: War Production Board, Chemicals Division, Washington 25, D. C. Ref: M-269.

# Chapter XI—Office of Price Administration PART 1314—RAW MATERIALS FOR SHOES AND LEATHER PRODUCTS

[MPR 141, Amdt. 2]

## RAW SHEARLING AND TANNED SHEARLINGS FOR THE ARMED FORCES

A statement of the considerations involved in the issuance of this amendment, issued simultaneously herewith, has been filed with the Division of the Federal Register.\*

Maximum Price Regulation 141, as amended, is amended in the following respects:

1. Section 1314.101 (c) is added to read as follows:

(c) *Maximum prices for sales of imported raw shearlings sold after arrival in the United States.* On and after November 17, 1943, regardless of any contract, agreement, lease or other obligation, no person shall sell or deliver imported raw shearlings sold after arrival in the United States and no person, in the course of trade or business, shall buy or receive imported raw shearlings sold after arrival in the United States at prices higher than the maximum prices established by this paragraph (c). The maximum price for sales of imported raw shearlings sold after arrival in the United States shall be the applicable maximum price set forth in Appendix C, plus 5% of such price, plus charges actually paid thereon for freight, war risk and marine insurance and freight from port of entry, all of which charges must be shown separately on the invoice delivered to the buyer in connection with each sale.

2. Section 1314.106 (a) is amended by deleting the words "of domestic raw shearlings or tanned shearlings for the armed forces" and substituting therefor, the words "subject to this regulation."

3. Section 1314.106 (c) is added to read as follows:

(c) Every person selling imported raw shearlings after arrival in the United States shall in connection with each sale, deliver an invoice to the buyer showing: (1) the name and address of the buyer and the seller, (2) an identification of each lot of shearlings sold, including the type, origin, description, wool length and the average weight per dozen skins, (3) the quantity in each lot of shearlings sold, and (4) the price contracted for or received, including a separate itemization of the charges for ocean freight, war risk and marine insurance and freight from port of entry.

**TIRES, TUBES, RECAPPING AND CAMELBACK**

A rationale for this amendment has been issued simultaneously herewith and has been filed with the Division of the Federal Register.\*

Ration Order No. 1A is amended in the following respects:

§ 1364.405 *Adjustable pricing and adjustment.*

2. Section 1364.405 (e) is added to read as follows:

(e) *Applications for authorization to perform contract boning for War Procurement Agencies.* (1) Any person who shows that he has been requested to perform government contract boning may file an application with the appropriate Regional Office of the Office of Price Administration for authorization to do such government contract boning and to charge or receive no more than the maximum price therefor fixed by this paragraph (e) in accordance with the provisions of this paragraph. The applicant shall show: (i) the name of the war procurement agency which has requested the applicant to perform government contract boning; (ii) that the war procurement agency has designated an official representative who will remain at the applicant's boning plant whenever government contract boning is performed and who will inspect, approve and otherwise supervise the applicant's operations and performance under such contract or contracts; (iii) that the applicant will as a condition of government contract boning perform such services only when the official representative is present at the plant, and then under his inspection, approval and supervision; and (iv) that the applicant will perform government contract boning in order to produce quantities of frozen boneless beef (army specifications) in addition to and not in lieu of other quantities of frozen boneless beef (army specifications) as the applicant is required to sell

(2) The Regional Office of the Office of Price Administration shall issue an order either authorizing the applicant to perform government contract boning for a designated war procurement agency in accordance with the provisions of and at a price no higher than the maximum fixed by this paragraph (e), or denying the application. If any person fails to comply with any of the provisions of this paragraph (c) or of the order authorizing him to perform government contract boning, the Regional Administrator may, in addition to any other penalties provided by law, revoke the order.

(3) The maximum price for government contract boning shall be \$0.55 per hundredweight carcass basis plus all of the bones, fat, sinews, kidneys and other by-products remaining from the production of frozen boneless beef (army specifications). The weight for determining the monetary portion of the maximum price shall be the weight of the dressed carcasses and/or hindquarters as the case may be, taken at the time of delivery by the war procurement agency to the applicant's boning plant. Each delivery of dressed carcasses and/or hindquarters shall constitute a separate transaction for purposes of computing the monetary portion of the price and the voucher submitted by the boner for payment must be accompanied by a verified memorandum for each transaction based upon the records kept pursuant to paragraph (e) (6) showing: the date, number and total weight of each grade of dressed carcasses and of hindquarters delivered by the war procurement agency; the total weight taken upon completion of the boning operations for each grade of boneless beef; and the total net weight of each grade of frozen boneless beef (army specifications) delivered to the war procurement agency.

(4) "Government contract boning" as used in this paragraph (c) means the performance, for a war procurement agency on dressed beef carcasses or hindquarters owned and supplied by such agency, of all operations and services, and the furnishing of all materials (except the beef) specified and required by "C. [Petroleum Directive 76<sup>1</sup>]

#### PART 1576—PETROLEUM INDUSTRY; DISTRICT FIVE

##### PETROLEUM SUPPLY ON WEST COAST, ALASKA AND HAWAII

The fulfillment of requirements for the defense of the United States has resulted and threatens to result in a shortage of various petroleum products for defense, for private account, and for export; and the following directive is deemed necessary and appropriate in the public interest, to promote the national defense, and to provide adequate supplies for military and other essential uses.

<sup>1</sup> See War Production Board, *infra*, Certificate 154.

§ 1576.1 *Petroleum Directive 76*—(a) *Definitions.* (1) "Person" means any individual, partnership, association, business trust, corporation, governmental corporation or agency; or any organized group of persons, whether incorporated or not.

(2) "War products" means petroleum products which are required to supply the Army and Navy of the United States, the Coast Guard, the War Shipping Administration, the United States Maritime Commission, and the Foreign Economic Administration.

(3) "District Five" means the States of Washington, Oregon, California, Nevada, and Arizona, and the Territories of Alaska and Hawaii.

(4) "Director in Charge" means the Director in Charge of District Five.

(5) "District Director" means the District Director of District Five to which reference is made.

(6) "General Committee" means the General Committee for District Five.

(7) "Functional Committee" means the Production, Natural Gas and Natural Gasoline, Transportation, Refining or Marketing Committee for District Five as may be specified.

(b) *Surveys, investigations, and programs.* (1) The General Committee shall obtain from or through the appropriate functional committees or subcommittees of such General Committee whatever facts, figures, and other data with respect to the available supplies of petroleum and petroleum products, and the demand therefor, and any other information necessary and appropriate for the purpose of determining the extent of existing or prospective shortages of any petroleum products to supply military or other demands for such products in District Five. To the extent that present or prospective shortages of any petroleum products are indicated either by the analyses of the facts, figures, and other data compiled as herein provided, or by the Petroleum Administration for War, then the General Committee, with which the District Director in Charge or the appropriate functional District Director shall sit for the purposes of this Directive, shall refer to the appropriate functional committees or subcommittees of the General Committee the task of proposing plans, programs or operating schedules for persons engaged in the petroleum industry to eliminate, alleviate or otherwise minimize the extent or effect of any such shortage. Such plans, programs or operating schedules shall be prepared by such committees in collaboration with the appropriate District Directors and submitted to the General Committee for transmittal to the District Director in Charge in the form submitted with its recommendation and any changes or modifications deemed desirable by such General Committee.

(2) In the event that any functional committee or subcommittee fails to propose to the General Committee, within the time specified by the General Committee, a plan, program or operating schedule to meet any indicated shortage, then the General Committee shall itself cause such a plan, program or operating schedule to be prepared.

(3) All proposed plans, programs or operating schedules prepared hereunder shall be submitted to the District Director in Charge and no such plan, program or operating schedules shall become effective until approved and issued by the Petroleum Administration in such manner and with such modifications as the Petroleum Administrator or Deputy Petroleum Administrator may authorize or direct.

(c) *Sales, exchanges, loans, and joint use of facilities.* (1) Subject to the approval of the District Director in Charge, prior to the consummation of any such arrangement, the General Committee for District Five shall, by or through the appropriate functional committee or subcommittee of the General Committee, arrange for sales, exchanges or loans of any crude petroleum, natural gasoline or petroleum products and for the joint use of facilities and for processing arrangements among those engaged in the petroleum industry in District Five in all cases which, within available supplies and capacities, will:

(i) Assure utilization of all crude oil produced in accordance with Recommendation 19;

(ii) Assure a supply of crude oil, other charging stock or petroleum products for the required operation of special refinery equipment used in the manufacture of war products;

(iii) Assure a supply of petroleum products required for blending with other petroleum products into finished war products;

(iv) Assure a suitable supply of non-war products to persons within the petroleum industry whose normal supply is reduced by supplying war products, or by operations under this directive;

(v) Assure the available use of facilities to any person within the petroleum industry whose normal facilities or methods of handling supplies are affected by war demands or operations under this directive;

(vi) Assure the most efficient use of storage and transportation facilities.

The terms and conditions of any agreement for the exchange, loan or sale of petroleum or petroleum products or for the use of any facilities made pursuant to this directive shall be subject to negotiation between the parties to any such transactions: *Provided*, That no price agreed upon shall exceed the applicable ceiling or other order of the Price Administrator.

If the individual parties to any such transaction are unable to agree upon a fair and reasonable price or other terms and conditions of any such transaction, any such dispute shall be referred to the District Director in Charge for such action as he may direct.

(d) *Administration of directive.* (1) In carrying out the duties, responsibilities, and functions under this directive, the committees and subcommittees mentioned and persons directly affected shall hold meetings and shall consult with other committees and subcommittees to the extent that proposals or activities hereunder may affect such other committees, and subcommittees, and to this end all such persons, committees, and

subcommittees shall supply the committees or subcommittees charged with any responsibility under this directive with such information, material, and assistance as may be necessary and desirable to accomplish the purposes and intent of this directive. Each of the committees and subcommittees herein referred to shall maintain such staff and appoint such persons as may be necessary to carry out its responsibilities, duties, and functions under this directive. Operating expenses of such committees and subcommittees shall be met as provided in § 1500.7 of this chapter.

(2) The committees or subcommittees shall make available to the District Director in Charge, at his request, all statistical data and other information collected by or in the possession of said committee or subcommittee, and any plan, program, or operating schedule shall be accompanied with supporting data and other information which renders the issuance of such plan, program or operating schedule necessary to accomplish the purposes of this directive.

(3) This directive shall not be construed to prevent any functional committee or any subcommittee of District Five from initiating or carrying out action as authorized or approved under any order, recommendation or directive of the Petroleum Administration or to alter any authorized method of dealing by any functional committee or subcommittee with the respective District Directors or other officials of the Petroleum Administration.

(e) *Appeals.* Any person affected by this directive or any action taken hereunder who considers that compliance therewith or the results thereof would work an exceptional and unreasonable hardship upon him may appeal to the Director in Charge, Petroleum Administration for War, 855 Subway Terminal Building, Los Angeles 13, California, setting forth pertinent facts and reasons why he considers himself entitled to relief. If dissatisfied with the decision of the said Director in Charge, such person may appeal within fifteen days after receipt of notice of the said Director's decision to the Petroleum Administration for War, Interior Building, Washington 25, D. C.

## TITLE 46—SHIPPING

### Chapter II—Coast Guard: Inspection and Navigation

#### NAVY DEPARTMENT VESSELS

#### WAIVER OF NAVIGATION AND VESSEL INSPECTION LAWS

By virtue of the authority vested in me by the provisions of section 501 of the

Second War Powers Act, 1942 (Act of March 27, 1942, c. 199, Title V, section 501, 56 Stat. 180, Title 50 Appendix U.S.C. Sup. II, sec. 635), I hereby waive compliance with the Navigation and Vessel Inspection laws administered by the United States Coast Guard to the following extent:

Whenever, with respect to any vessel owned, chartered, operated by, or carrying cargo or personnel for the Navy Department, an application under the procedure set forth in "Waiver of Navigation and Vessel Inspection Laws", 8 F.R. 9164, results in a denial to effectuate the waiver made in the order of the Acting Secretary of the Navy dated 1 October, 1942, 7 F.R. 7979, compliance with the navigation and vessel inspection laws which were the subject of such application shall nevertheless be waived if the Commandant of the Naval District or his duly authorized representative finds that military urgency outweighs the marine hazard involved and so states in writing to the District Coast Guard Officer, or to his designated representative, to whom the original application was made.

I deem it necessary in the conduct of the war that compliance with the Navigation and Vessel Inspection laws be waived to such extent.

#### Chapter IV—Office of the Coordinator of Fisheries

[Order 1838; Area Coordinator's Gen. Dir. 7]

##### PART 401—PRODUCTION OF FISHERY COMMODITIES OR PRODUCTS

##### MAXIMUM LOAD OF SMALL PILCHARD AT MONTEREY, CALIF.

Pursuant to paragraph (n) of § 401.2 entitled "Coordinated Pilchard Production Plan" (8 F.R. 9233), being Order No. 1838 of the Secretary of the Interior, hereinafter called the pilchard order, because the taking and delivery of excessively large and numerous loads of small pilchard tends to reduce the tonnage of large pilchard caught and delivered and thus to affect adversely the production of canned pilchard required for military and essential civilian use and because I deem it necessary to accomplish the purpose of the pilchard order, I hereby issue the following General Direction No. 7, for the observance of which by the fishing captain of any particular vessel the permittee thereof shall be responsible:

(a) The maximum load of small pilchard which may hereafter be brought into the port of Monterey including Moss Landing is hereby set at thirty tons.

(b) Any person bringing into Monterey or Moss Landing a load of small pilchard more

than five tons in excess of the maximum limit set in paragraph (a) above, and any person taking delivery of any part of such load in excess of the limits so fixed plus the five ton tolerance except pursuant to a direction expressly applicable to such excess tonnage given by the Port Supervisor or his Assistant with full knowledge of the facts, shall be guilty of violating this direction, and subject to remedial proceedings as are other violators of the pilchard order under paragraph (c) thereof. In addition the port supervisor may, in his discretion, delay dispatching any vessel bringing in such a load, for delivery of its load, or may cancel any dispatching direction already given for such load, or as to any part thereof, until all other pilchard deliveries in the port for that day are completed.

(c) No person shall bring into either Monterey or Moss Landing a second load of small pilchard within twelve hours of a previous load of small pilchard.

(d) The phrase "load of small pilchard" as used herein shall be taken to have the same meaning heretofore customarily given by the pilchard fishing industry generally in Monterey to that phrase, or to the phrase "load of small fish" or "load of small sardines".

**OFFICE OF ECONOMIC WARFARE.**

INTERNATIONAL TECHNIC, ET AL.

**ORDER DENYING LICENSING PRIVILEGES**

Pursuant to Part 807 of the regulations, adopted under section 6 of the Act of July 2, 1940, as amended, the Trade Intelligence Division, Office of Exports, Office of Economic Warfare, charged the respondents herein with the violation of section 6 of the Act of July 2, 1940, as amended, and the regulations adopted pursuant thereto. After due notice the respondents requested an oral hearing in accordance with § 807.7 of said regulations. The matter came on for oral hearing on October 5, 1943, before Kelly Kash, Compliance Commissioner for the Office of Economic Warfare. Respondents appeared by counsel.

The Compliance Commissioner received the evidence presented and after due consideration of the record on the 3rd day of November 1943 filed his findings of fact and recommendation in this matter. Said findings show that on or about June 17, 1943 the respondent exported to the Anahuac Machinery Company, Mexico City, Mexico, five units of gas welding equipment and two units of gas cutting attachments without having first obtained an export license authorizing said exportation; that on or about January 8, 1943, previous to said exportation respondents made application for license to the Board of Economic Warfare, predecessor of the Office of Economic Warfare, to export ten such welding units and five such gas cutting attachments to the said Anahuac Machinery Company; that thereafter on or about March 13, 1943, the Board of

Economic Warfare issued a license authorizing the exportation of only five such welding units and three such gas cutting attachments and granted an export license authorizing the exportation of said equipment in the quantity so reduced; that thereafter respondents knowingly and with the intent to export material without the necessary export license, on or about June 17, 1943, caused to be presented for clearance for export ten units of such welding equipment and five units of such gas cutting attachments representing to the Collector of Customs that the entire quantity of material presented for export was only five units of such welding equipment and two units of gas cutting equipment and as such was exportable under the above mentioned export license; that such acts of the respondents went beyond the scope of what could be determined a casual mistake but partook of all the elements of a wilful violation; and that said acts of the respondents were in violation of section 6 of the Act of July 2, 1940, and the regulations promulgated pursuant thereto. The Commissioner has recommended that the respondents be denied export licensing privileges for a period of one year, dating from September 21, 1943.

The undersigned having considered the findings and the recommendation of the Compliance Commissioner has determined that the findings of fact are supported by the record evidence and adopts the conclusion of the Compliance Commissioner that the violations are of such a nature and were committed in such a manner as to warrant the denial of licensing privileges as recommended by the Commissioner. The undersigned has concluded, however, because of the small amount involved that notwithstanding the wilful nature of the violation, a violation admitted by counsel for respondents, that the recommended penalty is too severe and he has therefore concluded to reduce the period of suspension to six months.

*Now, therefore, it is determined and ordered,* That the respondents, International Technic, Inc., and Charles Mitchell and any person, association or organization acting in behalf or for the account of them be and each of them is hereby denied the privilege of obtaining individual, or any other type of export license, or release certificate and is denied the use of any general or other type of export license authorizing any exportation whatsoever from the United States until March 21, 1944, and that all presently outstanding export licenses issued to the said respondents or any of them be and the same are hereby revoked.
